	Potential sites to find urban farm listing and contacts								
	There will likely be multiple sources for each state, these are just a few I've come across to get you started								
	Google search terms, Use AI (Claude) to source data from multiple authoritative sources then have it build an Excel spreadsheet to pull data from. Use AI (ChatGPT) to read and organize or separate columns from static website listings. **NOTE**: Nicole started with the "NJ Urban Agriculture Web Map." Because the site details are click-based popups, ChatGPT noted that the site records "are not extractable in bulk via direct scraping/search results." Clicking each data point manually was a very tedious task, and it is what inspired me to use AI.	microfarms, small farms, urban agriculture, urban farms, urban farmers, local food systems, agrihood, urban farm map, Food councils, sustainable or regenerative farms
