Location of Event: Chuuk Date of Event: **5-30-14**

Please put in the # of responses here

Please circle one

Everyone	Yes	No	NA	No response
Improved my awareness of the topics covered	14	0	0	1
Provided new knowledge	15	0	0	0
Provided new skills	15	0	0	0
Modified my opinions and/or attitudes	15	0	0	0

How many people do you estimate you will share some aspect of this project within the next 12 months?	4,085

See Below…

Producers – In the next year I am likely to use some aspect of this project to:	Yes	No	NA
Adopt one or more of the practices shown	14	1	0
Increase the operation's diversifications	14	0	1
Reduce my use of purchased off-farm inputs	14	1	0
Increase my networking with other producers	14	0	1

Professionals – In the next year I am likely to use some aspect of this project:	Yes	No	NA
In an education program that I plan or participate in	15	0	0
As a resource I will make available to producers	14	0	1
As a professional development tool for my peers	14	1	0
To improve advice/counsel I give to producers	15	0	0

Professionals – Please describe how you are likely to use some aspect of this project for an

I like to use some of the aspect of this project through radio program, leaflets and brochures within the state of Chuuk, FSM.

To educate our students to do more of these things that we learned from this training.

Well, for my student in my class I would like to teach them the step on how to grow plants or roots for a plant in a container. Teach that in English writing and reading.

Set up teams of trainer who participated in the workshop (willing **ILLEGIBLE**) and have them do trainings to the youth groups, women groups, family members in the communities and interested individuals from every island in Chuuk and after the training set up sites available and from willing people to contribute sites for farming, nursery, etc.

What promotes me in this training is about how to build a farm or plant plants. I never have interest in planting or farming since I learned how to make compose and enriched the soil to grow crops that is what I will teach my participants.

I will share with others the basics of crop production and management and also share with others the basic need for and procedures to ensure safe produce is offered to consumers during public health outreach program in the communities.

I will incorporate some of the information in the food safety in my quality system workshops. I will also use some of the marketing ideas in my marketing presentation. In community outreach I will teach how to plant new plants.

As the NCD healthy lifestyle administrator, we promote to our people to eat local food because it much cheaper and healthier than the imported food, this training taught me a lot of things that could help me taught our patients how to plant the local food so they could get it easier than going to the market and buy and at the same time it is a good exercise for them.

Since I did not learn many of what have been given to the group from the start, I would like to request that copy of all the lessons be given to me on a memory stick so I can keep studying and practice and share with my people starting from the people in my community. Note: I will study the lesson the CD then I share with other people.

To ensure and educate people for food safety consumption and to help people to know how to farm.
