

Who we are

Yahara Pride Farms is a farmer-led, not-for-profit organization working to improve water quality. We strive to help advance new ideas and technology that balance water quality improvement with farm sustainability and profitability. Our efforts include the following:

- Certification programs
- Educational events
- Cost-share programs
- Research and development
- Phosphorus reports

The Yahara Watershed outlined below is the focus of our organization.

PARTNERSHIPS. OPPORTUNITIES.
COMMON GOALS

Yahara Pride Farms partners with other corporations, businesses, grantors and other organizations in order to receive the appropriate funding necessary to achieve the goal of sustainable farming and improved soil and water quality. Becoming a Partner in Pride with YPF allows the opportunity to advocate for the preservation and enhancement of high quality soil and water resources for generations to come.

Cost-share program

Yahara Pride Farms provides a cost-share program with multiple practices. The goal of the cost-share program is to allow farmers the opportunity to test new, innovative technologies with minimum risk, in hopes that farmers will see the benefits from the technology and incorporate the practice into their standard operations.

The 2018 cost-share program offers the following:

- Strip tillage
- Low disturbance manure injection
- Cover crops
- Low disturbance deep tillage and cover crop planting
- Headland stacking and/or composting manure
- Composting manure
- Stacking of multiple cost-share practices
