## Greetings.

The Economic Development Survey Report for American Samoa, dated August 2000, identified critical areas for development. One of these areas was the need to identify marketing opportunities for locally produced commodities. The American Samoa Marketing Directory and its companion, the American Samoa Local Producers' Directory are being developed in response to this need to identify and expand marketing opportunities. It is our hope that these two directories will significantly impact the marketing opportunities and the economic welfare of our local producers.

The American Samoa Local Producers' Directory serves as a response to develop the market opportunities for producers of traditional, vegetable, fruit, livestock and value-added products. It identifies what is available and who is producing it. Retailers, restaurants, fishing fleet suppliers and consumers alike, can use this directory to restock their supplies for resale or purchase commodities for their own use.

In conjunction, the Marketing Directory identifies local retailers, restaurants, fast-food businesses and other organizations that purchase local produce and value-added products. This directory can be used by local producers to market their produce more efficiently. In the process of collecting the data for this directory, retailers and the others surveyed were not only asked what they currently purchase, but what they would like to purchase in the future as well. The response to the first part will enable farmers to market what they currently raise. The responses to the latter could present other economic opportunities for the farming community.

These directories will be updated and published quarterly. If you operate a business and would like to be included in the Marketing Directory or if you are a producer and would like to be included in the Local Producers' Directory, please call Larry S. Hirata, Agriculture Economist, at 699-1394.
