

JANUARY 25 & 26, 2017
Skamania Lodge ✪ Stevenson, WA

What should I expect from this conference?

The objectives of this conference are to:

- Improve your understanding about projected climate impacts on water accessibility in the PNW, and learn about sustainable management decisions.
- Create awareness of resources for adopting agricultural strategies that will make farming operations more resilient to climate change, while minimizing environmental impact.
- Build on the regional network of advisors and educators and take the knowledge gained at the conference and encourage adoption in the field.

Who should attend?

Agricultural, environmental, tribal, and municipal organizations, consultants, extension specialists, agricultural professionals, farmers/growers, Natural Resources Conservation Service (NRCS) staff, regulatory and policy staff, stormwater managers, research and irrigation district personnel.

What are the areas of emphasis?

This regional PNW conference will focus on:

- Regional projections of climate and water supply
- Multiple facets of agricultural water management
- Water conservation practices
- Water policy regulations and rights
- Water quality
- Social science communication concerning water
