

Rotational grazing set-up on paddock farm. Lane-way going from barn to pastures. Paddocks on both sides of lane. Hi-tensile fence along lane, temporary electric fence dividing each paddock.

Hi-tensile fence along laneway showing gates into paddocks. Gates are electrified spring gates. Can also see temporary fence dividing paddocks. Note the cow chain number used to identify the paddock number

Water system-plastic pipe and garden hose along the laneway provide water to each paddock. Water tank is placed under fence so it is accessible from 2 paddocks. This type of system was installed on several project farms
