Control

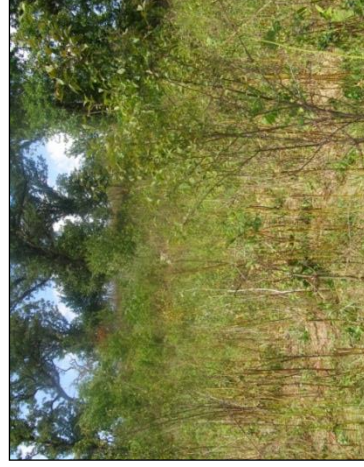

Light Browse

Heavy Browse

**August
2012**

Control, Light and Heavy Browse Paddocks Before and After Treatment. Visual assessment of photographs taken in June 2011 and in August 2012 shows reduced shrub cover under both browse treatments. August 2012 photos show almost complete defoliation in the heavy browse paddock while some foliage is still visible in the light browse paddock. Vegetation does not appear to have changed in the control paddock.
