

Table 1. The following table provides a summary of the 2012 North Georgia Bee Survey at four apple orchards. Native bees were sampled from March to October—roughly 1/month, except during the apple bloom when sampling was performed 1/week. A total of 5,091 bees were collected representing 5 families, 40 genera, and 115 species.

FAMILY	Genus	Hillside	Mercier	Mt View	Tiger
ANDRENIDAE	Andrena	191	30	1220	332
	Calliopsis	2	19	16	8
