

Montana Producer Antibiotic Use Survey

Thank you for your consideration of this survey!

Crazy Mountain Veterinary Service has teamed up with Montana Extension and livestock producers to research antibiotic usage in Montana livestock operations. Based on the survey results, we'll present educational workshops across the state of Montana to discuss treatment protocols for the most common diseases.

The information gathered on this survey will be used to identify the 5 most common illnesses treated on Montana operations and learn more about how producers are choosing and using antibiotics. The survey results will solely be used to help us direct our research for the second phase of the project, which includes determining the most effective treatments for the 5 most common diseases identified by this survey. The treatment protocols developed as a result of this survey will be presented statewide to assist producers on the ground in making timely and effective treatment decisions for their livestock operations.

This survey is for the producers' benefit. All responses will remain anonymous and cannot be traced back to you. If you prefer not to answer a question, you can skip ahead to the next question. You may stop at any time. Your submission of this survey indicates your consent to participate in this research. **Please only complete this survey once.**

Please contact Social Data Collection & Analysis Services at socialdata@montana.edu or (406) 994-5205 if you have any questions about completing the survey. You can complete the survey online by going to <https://www.montana.edu/socialdata/CurrentSurveys.html> and selecting **Montana Producer Antibiotic Use Survey**, or by scanning the QR code below. Questions about the use of human subjects in this research may also be directed to the MSU Institutional Review Board at irb@montana.edu. This research is approved under MSU IRB Protocol #2024-1567-EXEMPT.

Thank you for your participation,

Dr. Katie Rein, DVM
Marc King, Sweet Grass County Extension Agent
Rachel Endecott, PhD
Sarah Mauws, RN
Dick Raths, DVM

Montana Veterinarian Antibiotic Use Survey

Thank you for your consideration of this survey!

Crazy Mountain Veterinary Service has teamed up with Montana Extension and livestock producers to research antibiotic usage in Montana livestock operations. Based on survey results, we'll present educational workshops across the state of Montana to discuss treatment protocols for the most common diseases.

The information gathered on this survey will be used to identify the 5 most common illnesses treated by veterinarians on Montana livestock operations and learn more about how veterinarians are choosing antibiotics and advising/using antibiotics to treat producers' livestock. The survey results will solely be used to help us direct our research for the second phase of the project, which includes determining the most effective treatments for the 5 most common diseases identified by this survey. The treatment protocols developed as a result of this survey will be presented statewide to assist producers on the ground in making timely and effective treatment decisions for their livestock operations.

This survey is for the producers' benefit. All responses will remain confidential and will not be stored with your identity. If you prefer not to answer a question, you can skip ahead to the next question. You may stop at any time. Your submission of this survey indicates your consent to participate in this research. **Please only complete this survey once.**

Please contact Social Data Collection & Analysis Services at socialdata@montana.edu or (406) 994-5205 if you have any questions about completing the survey.
