

## 2024 small plot atrazine test

9/3 Nine sections sprayed with fractional atrazine doses as indicated by gray scale.

9/6 Re-inoculated ~100 kg of anti-herbicide compost (AHC) with 0.75 g atrazine (~7 PPM)

11/18 Weeds catalogued in western block (left 3rd of layout) before propane flaming:

100% dose: >90% wild garlic

1.5 - 13% dose: Wild garlic;

Carolina crane's bill & Henbit;

Wild carrot;

White clover;

Goldenrod, groundsel tree, & Virginia plantain.

11/19 All sections seeded with wheat, pea, clover, radish, and camelina pellets, indicated by box overlays.

3/2025 Minimal cover crop establishment. Occasional peas.
