

## 2023 small plot herbicide test

Layout

10/21 Four 15' x 20' sections sprayed with herbicides at labeled doses.

10/31 Eight rows sown as shown with wheat, pea, and camelina.

11/13 Microbiometer assays of total microbial activity ( $\mu\text{gC/g}$ )

	204	211	178	201
%Fungi	28	17	15	27

11/17 - Volclay pellet germination was markedly impaired.

Wheat germinated in all conditions other than Volclay pellets

No pea plants found in 2,4-D plot.

3/15/24 - No cover crop plants found in atrazine section or Volclay rows.
