

Figure 1. Soil respiration as measured by the Solvita test kit did not differ significantly between treatments (TRT) in a) full-season soybean (TRT $F_{3,83}=2.36$, $P=0.077$), b) winter wheat (TRT $F_{3,83}=0.56$, $P=0.642$), c) double-cropped soybean (TRT $F_{3,83}=0.44$, $P=0.727$), and d) corn (TRT $F_{3,83}=0.76$, $P=0.519$). Error bars indicate standard error, N.S.= No significance.
