

Figure 3. Variation in stigma counts within individual woodland and cultivar flowers from 2023 to 2025. Populations are represented in standard box plots (boxes encompass values that fall within the 25<sup>th</sup> and 75<sup>th</sup> percentiles, the vertical line within the boxes indicate median values, whiskers denote range of values within the 10<sup>th</sup> and 90<sup>th</sup> percentiles, circles indicate values that are beyond the 10<sup>th</sup> or the 90<sup>th</sup> percentile).
