

These SARE-funded demonstrations allow growers, extension agents, and community members to compare irrigation methods and better understand efficient water management practices for small-scale production systems.

Dr. Behnaz Molaei (middle) and students, Izabella Douglas (left) and Victoria Laster (right), prepare for the field day.

Sprinkler system options in multiple raised bed displays

SARE funding allowed for showcasing four different irrigation systems installed side by side in raised beds, including:

- Drip tape or inline drippers
- Online or punch-in drippers
- Spike drippers
- Micro-spray or micro-sprinkler irrigation systems
