

The Iowa Organic Association (IOA) and regional partners have developed a program to provide the information, tools and resources needed for agriculture service providers and consultants to support farmers interested in organic transition, diversification and expansion.

As the organic market continues to grow, Iowa producers, landowners and businesses are looking for opportunities to participate in this movement. Access to technical expertise and resources to support those interested in organic transition or expansion is necessary to help Iowa producers meet the growing consumer demand for organic products and practices.

Growing Organic Expertise in Iowa is a full-day workshop developed to provide information from organic experts and presented resources about the **National Organic Program, organic certification and transition, organic standards and production practices** and **insight into current organic market trends and demands**.

WHO SHOULD ATTEND: NRCS, Extension, IDALS, FSA, SWCD, RC&D, County Conservation, crop insurance agents, farm lenders, farming organizations, farmers, agriculture educators and students, and others interested in learning more about organic opportunities.

Sign-up to IOA eNews to learn about Summer Workshop dates:
