

Rooted in understanding ancient practices,
with a groundswell approach to trees on farms.

Working together for future growth.

Interlace Commons, the UMASS Student Farm at the Stockbridge School of Agriculture at and neighboring Simple Gifts Farm, are developing two educational demonstration sites focused on alley cropping typologies, a land use practice intentionally combining trees with crops. **For details about this project please email:** meghan@interlacecommons.org

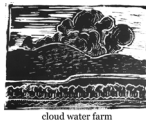

Interlace Commons' mission is to promote the adoption of agroforestry land-use practices. We achieve our mission through farmer-driven field projects, education, and research initiatives throughout the Northeastern United States. **To learn more about Interlace Commons:** www.interlacecommons.org

This material is based upon work supported by the National Institute of Food and Agriculture, U.S. Department of Agriculture, through the Northeast Sustainable Agriculture Research and Education program under subaward number ONE21-389.

Bach hedyn pob mawredd.

– Welsh Proverb

From tiny acorns, mighty oaks grow.
