

2023 SARE Grant Recipients

Our grant enables us to learn how to test soil on a microbial level and what to do with that data to improve soil health. We intend to pass the benefits of our grant to other growers!

We are also looking to add farms to our grant work and we plan on hosting educational courses throughout the grant process. If you are interested please join us for more details!

May 6th @ 10:30a for Refreshments
Gleaning Urban Farms
2765 Van Buren Street
