

The following is the text that was entered into a Qualtrics Survey Document that allowed ASPs to opt into the project.

I am interested in participating in the Northeast SARE State Project titled “Improving Farmer Engagement in Sustainable Agriculture Using Participatory Learning Techniques.” I understand that involvement in this program requires a commitment on my part through September 31, 2023, but with this commitment, I will be eligible to receive funding and support to host a farmer-related educational event, have access to educational materials and resources, and receive opportunities to attend professional development events related to various aspects of adult education and farmer engagement.

I agree to participate with the following project requirements and also understand that reasonable requests for accommodations and needs for flexibility can be resolved by working directly with [Kristy Borrelli](#).

Participant Requirements

- Any outreach work I do with this project will focus specifically on the needs of [farmers](#).
- To be eligible to receive financial support for the farmer-based event, I am required to participate in a *minimum* of:
 - 5 (each) written assignments and virtual meetings on the Digital Learning Center.
 - 1 in-person workshop.
- I will respond to all project-related evaluations.
- I will lead one farmer-based event on my choice of topic.
- I understand that funding is only available for 30 farmer-based education programs.

Email Address:

Briefly describe how your work qualifies to meet the needs of farmers and why you want to participate in this program. This does not need to be the final project you choose, but since there are a limited number of project spaces available, your input will help me determine if educational programming is appropriately focused on farmer needs.
