

Pollinator Fun Facts

Butterflies, moths, bees, beetles, flies, bats, wasps, birds, and even small mammals are all types of pollinators! Can you spot and name **5** that are on this sheet?

About **1 in every 3 bites** of food that we eat exists thanks to pollinators!

Pollinators carry pollen on their bodies when traveling from flower to flower, allowing those plants to grow fruits, vegetables, nuts, and seeds.

About **75%-95%** of flowering plants on Earth need help from pollinators.

Monarch butterflies taste with their feet!

Pollinators support our ecosystems, help keep our air clean and soils healthy, protect from severe weather, support other wildlife, and bring **\$217 BILLION dollars** to the global economy!

You can help your local pollinators by planting flowers and plants at your home, school, or community garden!
