Obj.	Activity																																																
1-1	Order research supplies	█																																															
1-2	Set up the experiment	█	█																																														
1-3	Routine management of the plots/pots	█																																															
1-4	Forage harvesting and Processing greenhouse	█																																															
1-5	Field experiment forrage harvesting	█																																															
	Soil sampling	█																																															
1-6	DNA extraction and sequencing	█																																															
1-7	PLFA assaying	█																																															
1-8	Enzyme assaying	█																																															
2-1	NH <sub>4</sub> and NO <sub>3</sub> - extraction	█																																															
2-2	Soil protein assaying	█																																															
1-9		█																																															
<b>Obj.ED</b>																																																	
1	Inception meeting and Survey	█																																															
2	Project meeting and farm tour	█																																															
3	End of project workshop	█																																															
2	Data analysis	█																																															
3-2	Bulletin publication	█																																															
3-3	Developing manuscript	█
