

SAMPLE Interview 1

Interview guide for Tapalou 8.16.21 Interview

648 sweet Pond rd. Guilford, vt 05301

1. To get started, tell me about why you got involved and how you decided what you wanted to do with this project. What interested you about it, and how did you determine what you would do?

2. Tell me about working with Abe and Arthur to get the plan developed and get started.

3. Please describe the application process you each ended up doing. Describe the experiment in detail. Include weather when applying, and dates.

4. What worked well about this process? What, if anything, was problematic?

Details – odors, difficulty with equipment, etc

Specific issues with drip irrigation system?

5. What have you observed so far about the growth of your flowers? Any differences among the treatments?

Hemp?

6. What would you do differently if you did this again?

7. Have you spoken to others about your involvement with this experiment? If so, how did you talk to them about it? What were some of their reactions?

8. What ideas do you have for follow up? How could you see this working on your farm in the future? Different system? Different crops?

9. What questions would you need addressed in order to try again?

10. Photos? Other documentation?
