We are creating a training program for greenhouse scouts and want to make sure that the scouts we train know all they should to be effective. Your answers on this survey will help us determine the training topics. Thanks for your help!

Who scouts for disease and insect pests in your greenhouse now?

- An independent (hired) scout
- An employee with the specific job of scouting
- All employees look for and report pest issues
- I'm a single person operation – I do it all
- Other (please explain)

If you have, or would like to have, a scout in your greenhouse (either independent or an employee), what would you like them to do/know to meet your scouting needs? Mark all that apply.

- Be able to find and identify insects (arthropods), diseases, weeds, and other potential problems
- Find information on pests and their management
- Provide management suggestions
- Communicate well
- Be in charge of biocontrols (order and release)
- Be in charge of pest management (including pesticide application)
- Other (please explain)

If independent scouts were available in your area, would you hire one?

- Yes
- Maybe
- No

How much would you be willing to pay an independent scout?

Would you give an employee paid time off to participate in a scouting school to learn how to scout or be better at it?

- Yes
- Maybe
- No

Would you pay for an employee to attend an online scout training program?

- Yes
- Maybe
- No
