

Spring High Tunnel Techniques Workshop

Come see how the urban farming duo, Tim and Cherry of Holistic Health Farms, manage their urban high tunnel, the first registered in Saint Paul!

Sunday April 29, 2018 | 2pm – 4pm

1243 Hewitt Ave, St Paul, MN 55104

Limited street parking, carpool when possible

Register at: TGAhightunnel.eventbrite.com

Learn about spring high tunnel production techniques from Tim, Cherry and fellow farmers. Tim and Cherry will demonstrate how they get the most out of their high tunnel in the spring and showcase their hydro/aquaponics set-up as well as their home-scale high tunnel design: mini-hoopers, a modular portable high tunnel for small plot sizes in home gardens and urban farms.

This workshop will be a "skillshare" event, so please bring your experiences and questions to participate/share in conversations with Tim, Cherry, and fellow farmers on:

- **Preparing your high tunnel for spring production**
- **Selecting and growing crops ideal for spring high tunnel production**
- **Deciding what size and type of high tunnel is best for you**
- **Using cover crops to maintain soil health in high tunnels**
- **Incorporating aquaponics & hydroponic systems in high tunnels**

\$50 travel reimbursement per farm available on a first-come first-serve basis for registrants. Reimbursement issued afterward with completed evaluation. Questions? Contact Andrew Bernhardt, Grants Manager at The Good Acre: andrew@thegoodacre.org or (651) 493-7158.

This event made possible by a NCR-SARE Partnership Grant; find out more at: <https://www.northcentralsare.org/>
