

Table 4. Results of soil micronutrient analyses for the 16 direct seed and conventional study locations in spring, 2013, 2014.

Values are means across landscape positions.

Site	Year	Al	Cd	Mo	Ni	Zn	Fe	Mn	Cu	B
parts per million

Cells with color indicate statistically low or high values.

Sites 3 and 5 were not sampled in 2014.
