

Table 6: CSSHP Goals & Objectives, 2019-2021

Goals	Objective		Accomplished
Strengthen connections between different factions of Colorado's agricultural community.	4 growers will participate in outreach events		Due to COVID and resulting ag-system stressors (labor shortages, radical market pivots) and infection control requirements, no outreach events with growers were held.
Improve key soil health indicators of CSSHP growers.	CSSHP growers' soil organic matter, soil health scores and days of living cover will all trend upward by 2021.		Individual CSSHP grower's data is erratic. It is difficult to discern trends. 23 or 42% of sites' soil health scores and 28 or 51% of sites' soil organic matter improved over 3 years.
