

bioenergy feedstock	bio-sequestration of
biomass crop for cellulosic ethanol	atmospheric carbon dioxide
produce butanol	forage grazing
fiber	game cover
produce electricity	hay for cattle
heat production	Abandoned mine land reclamation
fuel as a bale	Cattle pasture
fuel as a pellet or briquette	substitute for wheat straw
pressed particle board	livestock bedding
ground cover for soil conservation	phytoremediation projects
feedstock for biodegradable plastics	poultry house bedding
control erosion	straw bale houses
kitty litter	substrate for growing mushrooms
absorbent for spills	ornamental grass
