

# TOWER GARDEN STUDENT CHECKLIST

## DAILY CHECK (5-10 Minutes)

### Power & Equipment:

- Make sure the pump is plugged into the timer
- Make sure the timer is set to "I" (Inside mode)
- Make sure the extension cord switch for the grow lights is ON

### Water Flow:

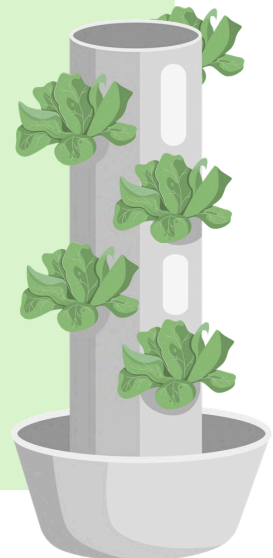

- Turn the water on and make sure water is hitting all seedlings evenly
- Look for any dry plants or blocked areas

### Plant Health:

- Check that leaves look healthy (not wilted or droopy)
- Look for discoloration or damage
- Remove any dead leaves

### Water Level

- Check the reservoir level
- Add water if needed (keep about 1-2 inch below fill hole)

# TOWER GARDEN STUDENT CHECKLIST

## DAILY CHECK (5-10 Minutes)

### pH Check:

- Test the water pH
- Ideal range: 5.5 - 6.5
- Adjust if needed

### Nutrient Check:

- After transplanting seedlings add: ✓ Half strength (10 mL A + 10 mL B per gallon)
- Total Nutrients: (20mL A + 20mL B per gallon)

✓ The second dose should be added 2 weeks after the first nutrient addition, as long as seedlings have true leaves and look established.

### System Check

- Make sure nothing is leaking
- Check that the pump sounds normal
- Make sure lights are positioned correctly
