

Comply with California SB 1383 Regulations

✓ Mandatory Food Donation

Under California SB 1383, certain businesses are required to donate surplus edible food instead of discarding it. Join FoodCycle to stay compliant with these regulations while making a meaningful impact!

🛡️ Good Samaritan Protection

Thanks to Good Samaritan laws, businesses across the U.S. are fully protected from liability when donating food. Donate confidently with FoodCycle!

Your Surplus Food
and Help
Transform Communities

Partnering to Feed LA County and Sustain Our Planet

- ✓ FoodCycle, in partnership with The City of Santa Monica, is on a mission to make food donations simple and accessible for people across LA.

- ✓ We're helping to sustain our community by fighting food insecurity and ensuring that nutritious meals are available to those in need.
- ✓ By redirecting food from landfills, we reduce methane emissions caused by food decomposition, helping to mitigate climate change and protect our planet.

Easy Food Donations with FoodCycle

- **Free Transportation Services:** We handle the logistics by providing free transportation to pick up your surplus food and deliver it directly to local communities in need.
- **Comprehensive Tracking with Careit:** Easily track all your donations through the Careit app, ensuring you maintain the necessary records effortlessly.
- **End-of-Year Receipts:** You may also be eligible for enhanced tax credits, we provide year end receipts.

Make an Impact—Support About 1 Million Food-Insecure Households in LA

Food insecurity affects:

About 1 million households in LA County face food insecurity, with children and the elderly being the most vulnerable. By donating your excess food, you're directly helping reduce hunger in these communities.

Fight Against Climate Change:

When food is thrown away, it releases methane gas—a potent greenhouse gas. By diverting food from landfills, you're helping to reduce harmful emissions and protect our planet.
