

WESTCHESTER *Mushroom Co.*

Check out our grant through Northeast SARE!

This grant is designed to improve the economic viability of local mushroom farming and promote sustainable agriculture.

Local farmers like us have trouble standing out against large branded farms that offer lower pricing and sleek branding.

By helping us purchase these display refrigerators for local retail locations, we will be able to greatly improve the quality and shelf life of our mushrooms, while also improving our visibility and sales. This will greatly improve the profit as well as the sustainability of the mushrooms, which will be high enough quality to donate to local food banks if they aren't sold during the week.

About Northeast SARE

The Northeast Sustainable Agriculture Research and Education (SARE) Program offers grants and education to farmers, educators, service providers, researchers and others to address key issues affecting the sustainability of agriculture throughout our region.

The program serves Connecticut, Delaware, Massachusetts, Maryland, Maine, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, West Virginia, and Washington, D.C. The program is administered by Northeast SARE's host institution, the University of Vermont.
