

Teaching and Learning Sustainability through School Orchards

Dr. Cindy Hale of Clover Valley Farm will present

This workshop will begin with an introduction to the basics of growing apples, including a discussion of tree varieties and pest management. Attendees will then investigate how to integrate school orchards into the curricula, including how to use school orchards as a teaching tool to meet standards. After lunch, attendees will visit the Community Orchard at the UMD Sustainable Agriculture Project Farm and participate in hands-on activities related to orchard site selection, preparation and management.

When: Monday, February 17 (President's Day) 8:30 - 2:30

Where: A.M. Session at UMD - P.M. Session at the Community Orchard at the SAP Farm (Lunch Provided)
