

Tables Flax Planting Date Trial 2013

Table 5. Plot characteristics and harvest yield of flax planted on four planting dates, averaged across two varieties.

Planting Date	Flax population plants m ²	Weed cover %	Yield lbs. ac ⁻¹
(1) 19-Apr	205	21.9	172
(2) 26-Apr	220	29.5	159
(3) 3-May	276	22.8	135
(4) 10-May	487*	26.6	93
Trial Mean	297	25.2	140
LSD (p<0.10)	90.684	NS	NS

*Varieties with an asterisk are not significantly different than the top performer in **bold**.
NS – No significant difference amongst varieties.

Table 6. Plot characteristics and harvest yield of two flax varieties, averaged across four planting dates.

Variety	Flax population plants m ²	Weed cover %	Yield lbs. ac ⁻¹
Omega	223	26.9	93
Rahab 94	371*	23.5	187*
Trial Mean	297	25.2	140
LSD (p<0.10)	64.123	NS	51.434

*Varieties with an asterisk are not significantly different than the top performer in **bold**.
NS – No significant difference amongst varieties.
