

Cross Training Survey Results

Cross Training 1: Pre and Post Cross Training Survey Results from Salinas on 4/2/15. Participants generally increased their understanding and ability to use the tools presented as shown by a shift from lower to higher in their responses.

Cross Training 2: Pre and Post Cross Training Survey Results from Santa Maria on 5/6/15. Participants demonstrated some increase in their understanding and ability to use the tools presented as shown by a shift from lower to higher in their responses. This was a more technical training than the first cross training, so the shift is less dramatic.

Pre Cross Training 2 Survey
