Applied Poultry Science - Producer Poultry Health Survey

This survey was compiled by poultry service providers across New England and New York. The purpose is to identify important poultry health issues and to provide targeted services and education to meet the needs of flock owners. All participants and individual results will remain confidential.

This survey should take less than 5 minutes of your time to complete. Information from this survey will assist with grant proposal preparation. Your participation in this survey is completely anonymous. No information is being collected about who or where you are (or the identity of your computer). Web link and Email collectors have been configured so they will not collect IP addresses of respondents. If you would like to leave the survey without completing it, you may do so at any time. Please realize, however, that if you partially complete the survey, then later want to come back and finish it, you will have to start all over again. We also request that you complete the survey just once, so we don't duplicate data.

1. In what state and county do you live now?
2. In the last year what types of poultry did you raise, manage or sell?
 - a) Broilers
