

grass run farms™

100% Grass Fed Beef

Introduction

Thanks for taking time to learn more about us. We are proud to partner with our industry's committed graziers and grass finishers.

Industry-Leading Quality

Grass Run Farms, founded in Northeast Iowa, has more than six years' experience producing and procuring the industry's best grass-fed beef--all from professional Midwest family farms.

Grassfed Exchange founder Wayne Rasmussen with USDA Prime beef

We primarily sell wholesale to distributors and other volume customers, processing on average 70 head per week out of Omaha, Nebraska. Our products include a full line of high-quality, consistent boxed beef and retail-ready products.

Contracting and Volume

We're looking to work with producers who contract semi-lot loads, filling our year-round harvest schedule. We meet with prospective producers in person to review protocol compliance, inspect cattle, and determine ways to best partner with you for a profitable, long-term relationship.

Realistic Production Protocol

Based on the USDA Grass-Fed Production Guidelines, our protocol ensures:

- 100% Grass Fed Angus. No grain, ever.
- Never given antibiotics or hormones.
- Born and raised on US family farms.
- Source-verified by Grass Run Farms.
- Affidavit-certified on delivery of cattle.

Custom Backgrounding & Finishing Services

Through our network of producers and partners, we offer custom backgrounding and finishing to your specification.

We also provide:

- Ration balancing resources
- Access to industry-leading nutritionists
- Feed brokering for competitive pricing
- Lowest pricing on inputs including apple cider vinegar and salt
