

RT TARPING WORKSHOP - FIELD PLAN

Name:

Farm:

Date:

Based on what you learned today, describe a tarp management change for a crop/crop type/planting that you could implement to reduce tillage on your farm.

Complete the following based on the crop/crop type identified:

Tarped crop/crop type(s):

Number of tarped beds:

Bed width (in):

Bed centers (in):

Bed length (ft):

Indicate previous bed management and proposed changes with target dates

Field Operation	Previous	Proposed
Prior crop/cover crop		
Residue management		
Pre-tarp tillage		
Amendments applied		
Tarp application		
Tarp removal		
Pre-plant/post-tarp tillage or other bed prep		
Planting (direct seeded, transplanted)		
Post-planting weed management		

What do you see as the greatest CHALLENGE in implementing this change?

What do you see as the greatest BENEFIT in implementing this change?

What additional information/tools/materials do you need to help you be successful with this change?
