Figure 1. Here is my tank under construction. Its final dimensions will be 6'x6'x4'.

Figure 2. I build three tables like this to put vegetable tanks on. The other two are in the greenhouse to keep them out of the rain.

Figure 3. The foundation of an old house was filled and leveled. We also cleared away trees to provide more sunlight to the system

Figure 4. I've planted taro in this area for now. I hope to use waste water from the fish tank to fertilize these plants in the future.

Figure 5. I will use a centralized standpipe to control water height and drainage.
