

MB 906

BioWest Ag Solutions™ MB 906 is a soil inoculant product with beneficial bacteria that may enhance biodiversity in the soil and promote plant health.

MICROBIOLOGICAL PRODUCT / OREGON LABEL

CONTAINS NON-PLANT FOOD INGREDIENT(S):

Pseudomonas fluorescens30 million CFU/mL

DESCRIPTION:

MB 906 contains naturally occurring soil inoculant, *Pseudomonas fluorescens* bacterium. MB 906 may improve soil structure and soil biodiversity by enhancing root development through rapid colonization around the root zone. MB 906 aids in breaking down organic matter to help release macro and micro nutrients and makes them more readily available for the plant to uptake.

WARRANTY:

Since weather, crops, soil and other conditions may vary, neither BioWest Ag Solutions™, nor the Seller make a warranty of any kind, expressed or implied, concerning the use of this product. The user assumes all risk of use and handling whether or not in accordance with directions or suggestions.

KEEP OUT OF REACH OF CHILDREN CAUTION

Harmful if swallowed. May be harmful or irritating to eyes, skin and respiratory system. Avoid contact with skin, eyes and clothing. In case of contact immediately flush skin, eyes or clothing with plenty of water. Do not ingest.

This product is intended for AGRICULTURE USE

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.htm>

PRECAUTIONS:

Wear eye protection and rubber gloves when handling. Avoid contact with eyes and open wounds. Rinse contacted areas with water. If ingested, give water and call a physician.

STORAGE AND HANDLING:

Do not contaminate water, food or feed by storage or disposal. Store in original container in cool, dry area and out of direct sunlight. Store in area not accessible to children. Keep container closed when not in use. Mix before use. **Expiration Date:** 3 months after batch date.

DIRECTIONS FOR USE:

Consult with your crop consultant for specific application recommendations.

Application Recommendations:

- **Conditions:** Apply as a spray solution to the soil surface. Optimum application conditions are cool (<50°F) and wet. For best results, apply before rain in the fall or spring before germination and with daytime temperatures below 50°F.
- **Application rate:** Use 1 gallon of product per 1 acre in 1 -30 gallons of water per 1 acre.
- **Volume of water:** Dependent on coverage of application equipment.
- **Avoid spray drift.**

COMPATIBILITY:

Do not tank mix with toluene, copper, antibacterials or surfactants that are used to reduce microbial growth. This product is compatible with most fertilizers, adjuvants, surfactants and herbicides. Check with your crop consultant about other tank mixes or co-application.
