

Table 5: Mean shoot tissue dry weight biomass in grams between treatments in two growth chambers under two temperature regimes

Growth Chamber	High Temperature		Low Temperature	
	Bean Mono	Bean-Rye	Bean Mono	Bean-Rye
Shoot Mean Dry Biomass (g)	2.59a	2.50ab	1.92bc	1.79c
Chlorophyll content	33.17b	37.69a	26.37c	25.09c

Means within the row with the same letter are not significantly different (LSD, $\alpha = 0.05$)
