

**Figure 1.** Photos of train-the-trainer nematode management workshops conducted in a) Monmouth, ME; b and c) Newport, RI; d) Allentown, PA; and e) Windsor, CT. Participants learned about diagnosing nematode damage, conducting and interpreting lettuce and soybean bioassays for visual nematode infestation assessment and understanding integrated nematode management options during 10 full-day workshops conducted across the Northeast region between fall 2007 and 2009.
