

Figure 3. Experimental area at OWNS site. Pastures are delimited by black lines and were numbered 1-12 from top (N) to bottom. Crosses indicate locations of visual estimated of botanical composition, purple circles indicate clipped quadrats, and red squares mark exclosures. Green areas are dominated by annual grasses and start thistle, light areas are dominated by medusahead, oats and annual ryegrass, and brown areas are rocky hill tops dominated by softchess and small forbs.
