Welcome to Our CSA!

Reserve your 2013 share of North Windsor Berries harvest & Experience a summer of fresh veggies!

We enjoyed our first CSA season in 2012 and opening the farm to our CSA members and welcoming each to our farm family. We'd like to extend our family for another year. We invite you to buy a 2013 share of our farm's bounty through our CSA program and join our growing farm family. CSA stands for community supported agriculture and as a community member, we hope you'll consider supporting our farm. Your reward? A weekly basket loaded with a selection of just-picked veggies from mid-June (with strawberries) until Oct 31st - that's 20 baskets!

The minimum value of your box will be at least \$20.00 for a full share and \$10.00 for a half share. And the produce will feed a family for an entire week (or a couple for a week, depending on a full or half share).

What's Different About Us?

Our CSA delivers right to your workplace. We recognize you're busy and sometimes can't make it out to our farm. So on either a Tuesday or Thursday in the late afternoon we'll deliver your share directly to your workplace in a reusable bag so you can take it home & enjoy that night!

Know Your Farmer - Trust Your Food-

When you reserve a weekly share, you become part of the extended North Windsor Berries family. And you're welcome to bring your family to our farm. We want you to meet us, farmers Linda & Bill Titus. You can tour our fields and see where your food comes from. While you're benefiting from the freshest produce available, your share supports our sustainable farming efforts that take into consideration our environment - soil, water, and air.

Savor The Goodness

North Windsor Berries harvests our farm's bounty in the morning; you pick it up in the afternoon/evening. You're getting the freshest possible that's in season - and bursting with flavor. To help you maximize your weekly share, we also provide recipes with your share inspired by the items in your weekly share. Not only does farm-fresh produce taste amazingly good, it's good for our planet: eating locally and eating what's in season reduces your carbon footprint.

Shares are Limited - Reserve Yours Now!

We wish we could share North Windsor Berries' harvest with everyone, but that's what makes our farm's produce special: we are not mass producers. If you'd like to share in the goodness, contact us today to reserve your share for the 2013 harvest season.

Deliveries will be every Tuesday or Thursday afternoons at your worksite. Please mark a preferred day for pick-up. We will confirm two weeks before the season starts your pick-up day, time and location. Additional produce is available for purchase upon pick-up.
