

E³A

Exploring Energy Efficiency & Alternatives

E3A Toolkit Webinars

Monthly webinars will be offered to allow educators to further modify and design programming with ideas from the webinars and with materials in the E3A toolkit. See reverse for webinar dates in 2012.

To join the webinars:

10 a.m. on the following days:

January 10

– Assessing Needs and Guiding Energy Exploration Using the E3A Toolkit

February 14

– User Guide Supplement – 15-30 minute programs that you can teach today!

March 13

– Home Energy – Exploring home energy with consumers: Key concepts and tips

April 10

– Solar Hot Water – Helping consumers understand solar hot water systems

May 8

– Micro-hydropower – When would micro-hydropower make sense?

June 12

– Farm Energy Efficiency – Conducting an informal on-farm energy audit.

Conference Number(s): 1-888-450-5996

Participant Code: 396755

July 10

– Renewable Energy Incentives – What you need to know

August 14

– Small Wind Energy – Determining when wind might work for a consumer

September 11

– Anaerobic Digesters: Assessing feasibility for agriculture operations

October 9

– Biodiesel – Considerations and common questions regarding biodiesel

November 13

– Solar PV – Applications and considerations for installing solar PV systems

December 11

– Additions to E3A: New programming options in 2013
