

Figure 2. Percent market oysters harvested on each sample date (top), mean shell height (mm) (middle), and percent cumulative mortality (bottom) through time for the four treatment conditions: 3-tier cage with two week cleaning (3T 2W), 3-tier cage with four week cleaning (3T 4W), flip top cage with two week cleaning (FT 2W), and flip top cage with 4 week cleaning (FT4W). Error bars represent standard deviation.
