

Leafy Greens Field Walk

Monday June 3rd, 4:45-7:00 pm

Cloud Mountain Farm Center

6906 Goodwin Road, Everson, WA 98247

<http://www.cloudmountainfarmcenter.org/>

Everson, WA – Do you grow leafy greens for sale as a salad mix or braising mix? Are you wondering how new food safety regulations will change how you can market these products? Are you looking for efficient new ways to plant and harvest this high value crop?

Join us at the June 3rd field event at Cloud Mountain Farm Center, focused on leafy greens production, with opportunities to learn about:

- A SARE grant project to test antimicrobial rinses for use with leafy greens (Karen Killinger and Andy Bary from WSU; Dan Hulse from Tahoma Farms)
- New food safety regulations around marketing leafy greens (by Whatcom County Health rep.)
- Mechanization of planting and harvest including a demonstration of the bed shaper, seeder, and mechanical harvester
- Variety trial research currently occurring at Cloud Mountain Farm Center and WSU Mt. Vernon

This event is free and open to all who may be interested. Any questions feel free to contact Chris Benedict (chrisbenedict@wsu.edu) or Dan Hulse (dan@tahomafarms.com).
