

Figure 3: Overview of fields and facilities monitored

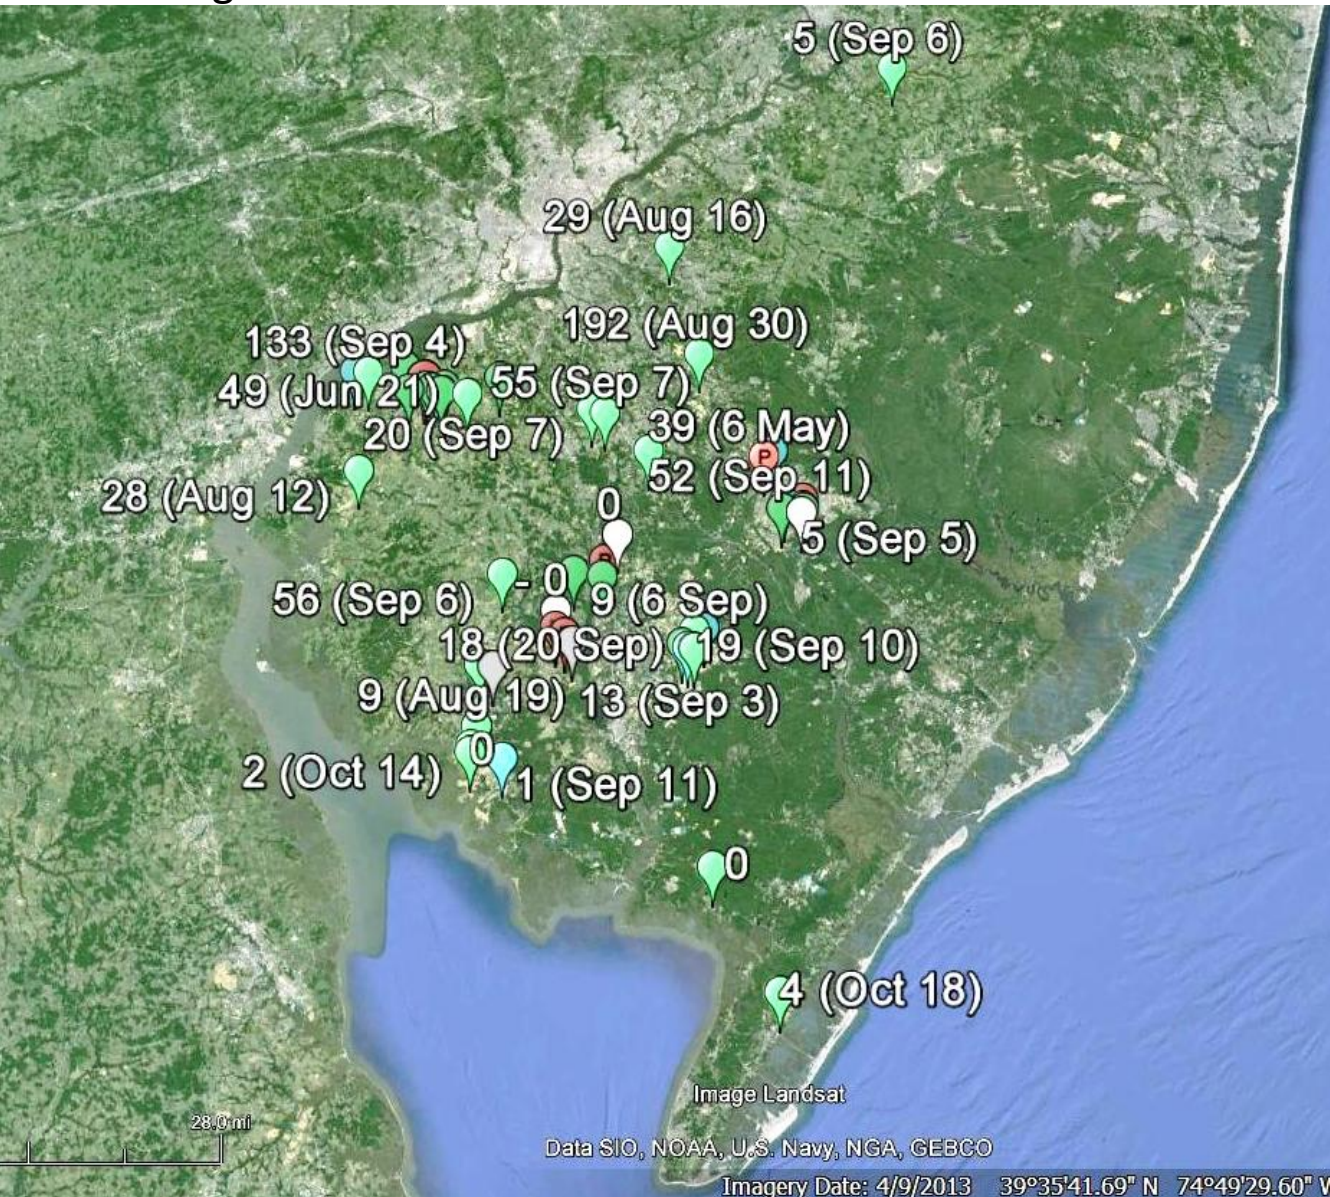

Figure 3 gives an overview of the area monitored and provides markers showing where traps were placed during April to December of 2013.

The markers show:

Green -pepper or tomato field

Red – processor or packer

Blue – Other facility (market, empty field, housing)

The lead number is the number of weevils caught for the season. The date is the date of first card catch. The early dates are all associated to processors.
