

Ever wonder what soilborne pathogen do to your crops and profitability  
or how you can manage them on an as-needed basis?

# Identification, Assessment and Management of Soilborne Plant Pathogens in Vegetable Production Systems

March 20, 2013

8:30 am to 4:30 pm

NYS Agricultural Experiment Station, Cornell University

Jordan Hall

630 W. North Street

Geneva, NY 14456

<http://nysaes.cornell.edu>

## Workshop description:

Through funding from the NE-SARE, this workshop has been designed to train participants throughout the Northeast in the identification, assessment and management of soilborne pathogens and to provide resources that can be used on-farm and in various outreach activities.

## Who should participate?

Growers, county extension educators, regional specialists, crop consultants, IPM practitioners and other agricultural service providers

## Workshop facilitators:

Beth Gugino – Penn State

George Abawi – Cornell University

Jim LaMondia – The Connecticut Agricultural Experiment Station

## Topics to be covered:

- Understanding pathogen biology & ecology
- How to identify soilborne diseases on major vegetable crops in the Northeast
- Methods for assessing soil pathogens and crop loss
- Disease management options

## Participants will receive:

- Lunch and breaks
- 3-ring binder of resources
- Trowels

## Register early space is limited!

Cost is \$20 and pre-registration by March 15, 2013 is required!

To pre-register contact Angela Parr  
Cornell Cooperative Extension:  
(585) 394 – 3977 ext. 426

Make checks to:  
“Cornell Vegetable Program”

Or register and pay on-line at:
