

# Agricultural Conservation Leasing Workshops

Why are conservation practices less common on leased farmland?

*Lack of communication • Lack of knowledge • Lack of security in the rental relationship*

These train-the-trainer workshops will give agricultural service providers communication and leasing strategies to help landowners and farmers overcome the challenges of implementing conservation practices on leased

farm land. **Interested landowners and farmers are also encouraged to attend!**

**Nutrient Management Continuing Education Credits Available!**

More information and registration available at: <https://agresearch.umd.edu/agroecol>
