7. At the initial training we received a reference notebook. This year we have continued the list serve, website for Applied Poultry Training, offered a number of webinars through eXtension.org, published additional poultry factsheets, and developed a large slide bank to utilize for poultry programs that we offer to the public. Have you already or in the future plan to utilized these materials?

2. As a whole, how useful was the training to you and your work as an agriculture service provider? - Comments
Answer
Valuable as a resource to someone new in the field; many contacts were made.
This has been a great group to learn from and with which to discuss poultry information. Over time, attitudes have changed to be more inclusive of others' points of view, and thus, I think all of us are more informed and also informative.
While I do not work with the number of farms other provider types do, I find that the wide range of topics has provided me with a much greater base of knowledge than I previously had. I am also very pleased to have such an extensive email network of fellow participants when questions arise.
3. Do you think the recent 2016 training built on the previous trainings to continue your learning with this professional development project? - Comments
Answer
Only involved for 1 year but training was very useful and I was able to learn about previous training to know that it was continuous.
There was some review, but it was good to recognize how much I had already learned.
6. Was there adequate time for each topic presented? Use the section below as you respond per session. If you did not participate, simply check N/A - Comments
Answer
We need to keep revisiting the slide share!
As will happen with any conference or group of presentations, some will run over a bit due to extra questions and discussion. I think that any lack of adequate time for topics was due to additional interest in a previous one, and lack of enough hours in the day to go too much over allotted times.
8. Now that you have completed the three of the Applied Poultry Science Trainings and are more aware of participant expectations, how do you feel about your involvement in this special, 2-year long professional development project? - Other responses
Answer
I was an instructor with the grant
9. In the future if a similar professional development grant were awarded, what type of training, topics, programs, etc. would you be interested in attending? - Responses
Answer
Meat science (beef, sheep, swine, goat)
I think we could benefit in the area of any kind of small farm animal species' care.
more on poultry
rabbits
I would like to continue with this group and expand into other species.
I would love to see a similarly structured program for swine, small ruminants, or dairy cattle.
I would love to continue in this same manner with livestock. As providers, most of us deal not only with Poultry, but farms which raise a wider variety of animals. I think it would be very beneficial to have another set of similar livestock workshops which may focus on management and management styles, basic veterinary care, feeding and housing.
