Preparation for Breeding Season - Apr 11 Alexandria Straight and Brad Smith	11	8		
Small Ruminant/Camelid Management - Apr 11 David Moran	12	6	1	
BQA Basics and Calf Processing - Apr 11 Bill Shockey	11	8		

5. Based on what you learned from this Animal Health Short Course, are you going to make any changes in your livestock management practices?

Yes **19**

No

6. List any comments about this program and/or suggestions for future programs.

Good Video and Presentations; very informative program; Break-down spring & fall – shots for cattle; recommend for our area (preston county) Break down spring & fall shots recommended for calfs! A handout or notebook with columns for a herd record keeping. Program to teach – FEC, small class size, have a fee for several week class/coarse; some of the material is rather complicated, maybe a little longer program with a more in depth approach would be helpful, some in the class were very knowledgeable of the materials while others of us were total novices. Great ideas

7. How did you first hear about this program (check one)?

2 Website **4** Newspaper **5** Flyer

1 Postcard **4** Radio

7 Other (please list): **From a friend; husband; winter dinner meeting; Mon Soil Conservation Meeting;_**
