

Figure 1 Percentage paint removal from Indicator of Reduction in Soils (IRIS) tubes during anaerobic soil disinfestation (ASD) with different cover crops or wheat bran (standard) as carbon sources.

Error bars indicate standard error, P -value is the analysis of variance P -value, bars with the same letter(s) do not differ significantly at 5% level of probability. Means were separated using Fisher's least significant difference test on square root transformed data. Data presented are from two independent experiments each with three replications.
